

## General storage conditions - Reels

Our company makes every effort to ensure the highest possible quality of its products. To keep the high quality at a sustainable level, it is necessary to observe the basic rules of storage and manipulation with the products.

### General storage conditions:

#### 1. Optimal ambient conditions

Paper must be stored under ambient conditions as specified below and properly protected from external influences.

- Relative humidity ideally 55 – 65 % (max. up to 70 %)
- Temperature 5 – 30°C

#### 2. Fire prevention measures

Avoid open fire, do not smoke.

#### 3. Preconditioning

To ensure optimal runability the paper should be stored unwrapped 24 hours (minimum 12 hours) prior to usage on the production floor.

#### 4. Shelf life

No limitations are known. A minimum of 1 year is guaranteed, if the products are properly stored.
